## TECNOMOTOR INTEGRATED SYSTEM

improves its tech support with **TIS WEB** including the Workshop Technical Data ONLINE.

A PLATFORM WITH THE GOAL OF MAKING WORK EASIER, OFFERING A SERIES OF "GUIDES AND PATHS" THAT ARE DIFFERENTIATED DEPENDING ON THE TYPE OF DEFECTS DISCOVERED IN THE WORKSHOP, MAKING REPAIR AND MAINTENANCE PRECISE AND ACCURATE.

TIS and TISweb integrate the information required to carry out vehicle repair and maintenance activities.

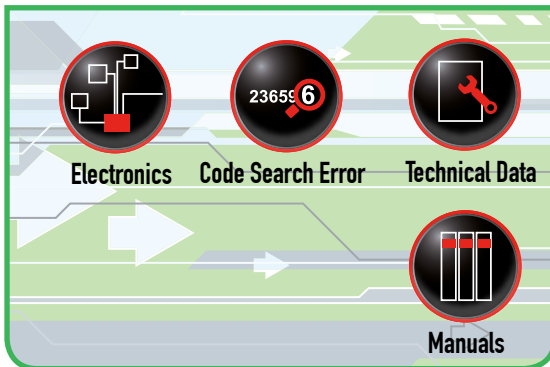

The technical specifications, the manufacturer's original procedures, the spare part prices are available both on the diagnosis instrument and through the use of an Internet browser. The "Electronics" section, integrating the "Error Code Search" (DTC) includes the wiring diagrams and the troubleshooting procedures, the special exclusive link between vehicle control unit (ECU), diagnosis tester (TIS) and on-line information (TISWEB), and allows having everything available in a single environment. The archive of your customers and their vehicles can be consulted with a click: making a service quotation is simple and quick.

**TIS WEB** is available in two versions:

### TIS WEB TECH

CODE 8-67501919

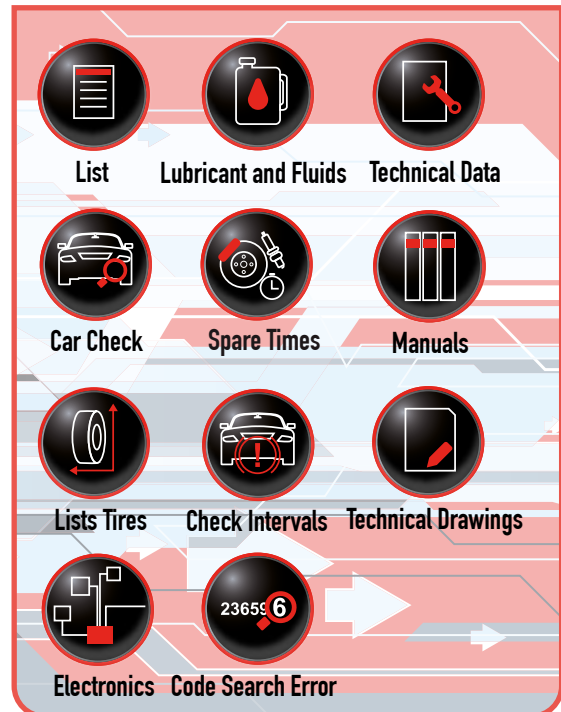

WHICH OFFERS THE FOLLOWING SERVICES:

### TIS WEB FULL

CODE 8-67501920

WHICH OFFERS THE FOLLOWING SERVICES:
